

SAWO FINLAND - **SAVONIA SAUNA HEATER (PREMIUM)**

Manufactured to an Australian specification, the Savonia sauna heater range is a floor standing model suitable for both large residential and commercial sauna rooms. They are designed to withstand extreme heat and need little care or maintenance. They are equipped with large stone compartments (50-100kg) which allows a pleasant amount of steam to be produced when water is thrown on the stones. The Savonia range is particularly suited to apartment buildings, hotels, leisure and fitness centres and other commercial facilities.

FEATURES . . .

- Finnish designed and engineered
- Manufactured to an Australian Specification (AS)
- Stainless steel outer cover and internal parts including rock compartment
